Brandodesign, founded by architect **Pierangelo Brandolisio**, was born from a passion for animals, for the environment in which we live and for the nature that surrounds us. From this vision the **Brando collection** was created: beds, shelters and accessories designed for dogs and cats, conceived to offer comfort, wellbeing and a harmonious place within the home. Each product is the result of careful research combining **animal wellbeing, quality materials, innovation and essential design**, with particular attention to craftsmanship. Today the **Brando Pet Home Collection** is part of the **Riccardo Rivoli** family, an Italian company specialized in the design and production of furniture distinguished by attention to detail and the culture of Made in Italy.

ANIMAL WELFARE

"The definition of *Animal Welfare* is the balance the animal may find in its living environment together with a good physical and mental health." Brandodesign designs and produces products for dogs and cats with the aim to give the animals the maximum comfort in relation to their needs and their distinctive characteristics. The products of the **brando** collection are designed so as to allow a simple and regular cleaning by favouring a greater hygiene as well as ensure a healthy dwelling space.

INNOVATION

Innovation is experimentation, study and analysis. Innovation is achieved with the completion of an idea aimed at overcoming conventional schemes. Imagining a better tomorrow for our animals, Brandodesign searches for free and new forms, which become tangible through the use of high quality and innovative materials.

DESIGN

Design is a universe to be imagined, a world to be discover, not only in the aesthetic and formal aspects, but also with regard to the prospect of liveability in a broader sense. Design is "a research laboratory in the field of applied arts". It is an emotion that tells the story of the influence that flows between man and object. The models of the brando collection suggest the different possibilities to conceive a comfortable space for our beloved pets. The attention to detail and the simplicity of the compositional lines define our style and elegant character.

CRAFTSMANSHIP

Fine craftsmanship is part of the Italian identity as well as its heritage. It is excellence, it is originality. Its knowledge is handed down from ancient generations. Brandodesign is a journey between past and present, where the forms become reality thanks to the inspiration of Master Craftsmen capable of transforming precious materials into fine designer pieces, which distinguish the exclusivity of the Made in Italy ideals.

DUNE

06 | 07

“*Inspired by the immensity of nature
and the soft waves of the deserts*”

BRANDO – Pet Home
A Riccardo Rivoli Collection

This structure is made entirely of multilayer birch plywood, a material, which is resistant and easy to clean due to the natural oil treatment of the wood. The enveloping surface follows the animal's anatomy, allowing the dog and the cat to recline and relax more comfortably. Raised off the ground by means of removable feet, natural ventilation is allowed, avoiding contact with cold floors. It is possible to personalise the bed Dune by using the shaped leather draper "Baie", designed to make the rest of the animal even more comfortable.

MIRA

“An elegant execution
of tradition and modernity”

MIRA 1

The Mira collection is composed of solid wood frames of interlocking elements, where a removable bed base with slats of solid wood is positioned and upon which a cushion with removable cover is placed. This pet bed is designed to give the pet utmost freedom of movement. Raised off the ground by means of removable stainless steel feet, it creates a dry, ventilated and healthy dwelling space. It is also possible to personalise the bed Mira by choosing from a full line of cushions available in different colours and fabrics.

TRONO

“ *Life fit for a king* „

28 | 29

Trono is a unique shelf built for cats which is characterised by a board of solid wood, which is fixed to the wall by a brushed stainless steel support. It is available in the wood finishes of fir, elm, oak and walnut. The shelf structure is made of interlocking wooden elements, with enveloping curved edges to contain a soft cushion from the *Laccio* or *Prato* line, available in different colours and fabrics.

TUNNEL COR-TEN

“A unique elegance with free
outlines and warm tones”

BRANDO – Pet Home
A Riccardo Rivoli Collection

This structure is made of cor-ten steel and has two openings; it is characterised by a variety of holes, ideal for the cat to observe its surroundings and retire undisturbed, granting a peaceful rest. The pedestal *Cavaliere* and the support *Sire* allow you to place the cat house in a suspended position or to fix it to the wall. Used in conjunction with the *Ramo* cushion line, it is fully customizable in different colours and fabrics, always with the comfort of the cat and aesthetics of the caregiver in mind.

CUSHIONS GIGLIO

MICROFIBER

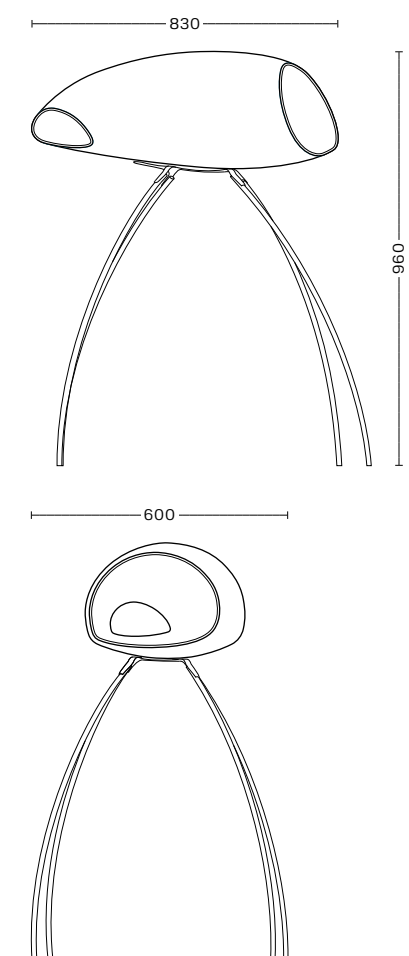

- › Tear resistant
- › Sun damage resistant
- › Resistant to pilling
- › Water-repellent
- › Machine washable at 40°

Baco: code **BAC**

The cat house Baco is entirely hand made. It is composed of a stainless steel structure covered with woven wicker. It is positioned slightly off the ground by means of a system of flexible stainless steel slides, which give this cat house a sense of natural softness. This model makes the cat feel enveloped and protected, allowing it at the same time to observe its surroundings through the little slits in the woven wicker. Furthermore, the two diametrically opposite openings offer the cat an ideal place to dwell. This cat house can be made even more comfortable by adding the cushions of the *Giglio* line made of reinforced microfiber, which are available in different colours.

BRANDO – Pet Home
A Riccardo Rivoli Collection

TORRE

“ *Wide-ranging height.
nature and play* ”

BRANDO – Pet Home
A Riccardo Rivoli Collection

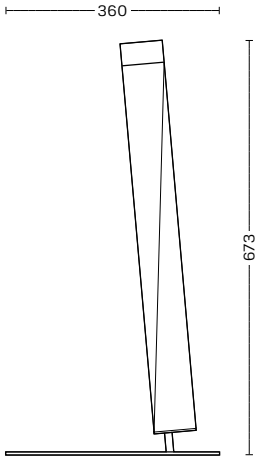

Torre is a vertical scratching post for your cat. Its innovative design allows your cat to fully stretch its body. The leather-coated stainless-steel base ensures stability and supports a vertical wooden element, interwoven with a refined and interchangeable jute cord. Torre has a customizable wood insert in walnut, oak and chestnut. You can also choose the color of the leather and the toy.

TORRE

IRIS AND MALVA (MIRA) – INULA

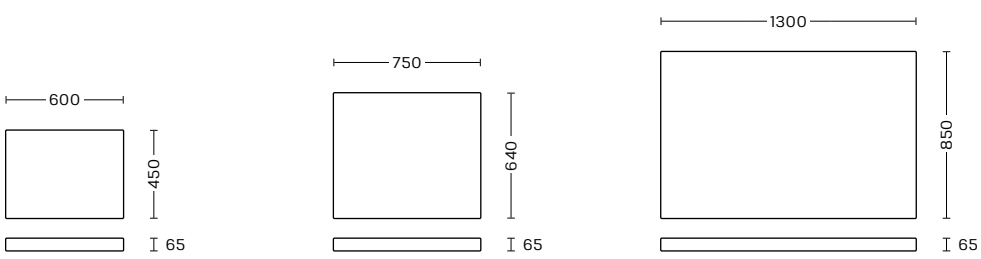

Iris, Malva and Inula are available in microfiber, tear resistant and water-repellent. The base, made of non-slip fabric, prevents the cushions from shifting once placed on the surface. In order to guarantee maximum hygiene, the brando cushions have removable covers secured by touch fasteners, and are washable with proper care. They can be used individually or in combination with the *Mira* beds.
